About Me

After I finished my further education as a frontend developer in 2021, I worked in a medium-sized Software Company on various projects. In these projects I was able to deepen my knowledge in Angular and TypeScript and also gain first insights into the programming languages PHP and React JS. In the previous company I worked as a frontend developer and mentor at the Developer Akademie. I was involved in internal projects and helped aspiring developers to achieve their goal to become professional software developers.

Main Stack:

- JavaScript, TypeScript
- Angular, ReactJS, NextJS
- HTML5, CSS3
- Material Design, Bootstrap, Tailwind CSS
- Firestore / Firebase Datastore, MongoDB, Redux
- Git/Github (https://github.com/MustafaGuer)

Skills

- **Building Applications with Angular/React/Next**(Chauffeurservice booking Website, Responsive Websites, SPA)
- **Working with libraries** (Bootstrap, Tailwind, Redux)
- **Software-Project Management:** Understanding Scrum & Agile Project Management, using agile principles while developing applications in group projects.
- **Version Control:** Git / Github
- **IDE:** Visual Studio Code, WebStorm
- **Linux Distribution** (Linux Mint Debian)
